WE ARE MAKING IT EASIER TO BUILD IN BLOCKS.

ARCHITECTURAL AND GOLDEN TROWEL AWARDS

The Awards presented by CMAA aims to inspire innovative architectural designs in concrete masonry, and to encourage excellence among blocklaying apprentices in Australia.

TECHNICAL MANUALS

CMAA develops technical manuals, information and advice relating to concrete block walling, concrete paving, permeable paving and concrete masonry retaining walls.

ACCESS TO DESIGNPAVE

DesignPave is a pavement design software developed in collaboration with the University of South Australia, to assist engineers and landscape architects on the structural design of concrete segmental pavements.

The software provides a simplified design approach to segmental pavements for all segmental paving applications, such as residential and industrial pavements.
